

JAIME S. FLORES

Software Engineer / Full-Stack Web Developer

San Juan City, NCR | jaimeflores0815@gmail.com | +63(969)174-7897

Summary

Senior Software Engineer with 9 years of experience (since 2017) designing and building scalable web applications, APIs, and enterprise systems across government and private sectors. Strong expertise in Reactjs, Node.js, and TypeScript, with a focus on backend, frontend development, system architecture, and database optimization. Proven track record of leading development teams and delivering high-impact solutions, including fintech platforms and large-scale web systems.

Skill Sets

- **Programming Languages:**

Go, TypeScript, JavaScript, Python, PHP, Java, C/C++

- **Frontend Development:**

React.js, Laravel, Three.js, HTML, CSS, SASS, Responsive Web Design

- **Backend Development:**

Node.js, Keycloak, Gin Framework (Go), RESTful APIs, GraphQL, API Design & Integration

- **Databases:**

MySQL, PostgreSQL, MSSQL, Oracle (PL/SQL), Database Design & Optimization

- **DevOps & Tools:**

Docker, Git, Redis, NGINX, Postman, Jira

- **Systems & Infrastructure:**

Linux Configuration, Deployment, Virtualization (Oracle VM VirtualBox), Server Management

- **Software Development:**

System Architecture, Performance Optimization, Scalable Systems, Full-Stack Development

- **Industry Experience:**

Fintech Systems, Investor Wallet Platforms, Government Systems (LTFRB), Enterprise Web Applications

- **Other Tools & Technologies:**

XAMPP, WAMP, Laragon, Linode, REST API Integration

- **Soft Skills:**

Team Leadership, Problem Solving, Cross-functional Collaboration, Agile Development, Mentoring Junior Developers

Certifications

- 2nd LTFRB NATIONAL INFORMATION & COMMUNICATIONS TECHNOLOGY (ICT) SUMMIT 2023: "Progressive LTFRB through Rise of Digital Transformation" (11/2023)
 - REPORTS DEVELOPER 10g: BUILD REPORTS (11/2016 - 03/2017)
 - ORACLE IDS FORMS: BUILD INTERNET APPLICATIONS I (06/2016 - 10/2016)
 - DATABASE ADMINISTRATION FUNDAMENTALS I (11/2015 - 03/2016)
 - INTRODUCTION TO ORACLE PL/SQL (06/2015 - 10/2015)
-

Professional Experience

Senior Backend Developer (Contract)

Dvote Software Corporation

09/2025 – 01/2026

- Developed and enhanced backend systems for mWell, an all-in-one health and wellness platform, supporting scalable healthcare services and digital patient solutions
- Improved and maintained the HealthHub system, enabling patients to schedule doctor appointments, upload medical records, and streamline clinic visit workflows
- Designed and implemented a Unified Electronic Medical Records (EMR) system to centralize patient data and improve accessibility for healthcare providers
- Built and optimized RESTful APIs using Node.js and TypeScript to support telemedicine features, patient data management, and real-time system interactions
- Collaborated with cross-functional teams to enhance system performance, reliability, and data handling for high-volume healthcare usage
- Ensured secure handling of sensitive medical data through robust backend architecture and best practices in data protection

Lead Software Developer (Full-time)

Inspire Next Global Inc.

06/2025 – 08/2025

- Led a cross-functional development team in building an Investor Wallet platform for Japanese and Filipino clients, enabling secure time deposits and real-time portfolio tracking

- Designed and developed scalable backend systems and APIs using Node.js and TypeScript to support financial transactions and user account management
- Architect core features including deposit processing, investment monitoring, and asset visualization dashboards
- Collaborated with stakeholders to translate business requirements into technical solutions tailored for real estate and fin-tech operations
- Ensured system performance, security, and reliability through optimized database design and API efficiency improvements
- Oversaw end-to-end development life-cycle, including planning, code reviews, deployment, and team mentoring

IT Engineer / Software Engineer (Full-time)

Fundamentals IT Solutions

04/2024 – 03/2025

- Developed and maintained web and mobile applications, including e-commerce platforms for clothing brands and online gaming systems for international markets (India, Pakistan, Bangladesh)
- Built responsive and interactive user interfaces using React.js and TypeScript, ensuring cross-device compatibility and performance
- Designed and implemented backend services using PHP and .NET, supporting game logic, user management, and transaction processing
- Deployed and managed applications on DigitalOcean, handling server configuration, monitoring, and system reliability
- Collaborated with cross-functional teams to deliver custom software solutions tailored to client business needs
- Contributed to full-stack development, integrating frontend and backend systems to ensure seamless user experience and system functionality

Computer Programmer III / Team Leader (Contract)

Land Transportation Franchising and Regulatory Board (LTFRB)

07/2023 – 06/2024

- Led a development team in building and deploying an enhanced Franchising Information System (FIS) for nationwide public utility vehicle (PUV) registration and certificate issuance
- Developed full-stack web applications using Laravel (PHP) and MySQL, supporting franchise processing, approval workflows, and regulatory operations
- Architected and implemented a centralized system integrating Luzon, Visayas, and Mindanao operations into a unified national platform
- Set up and managed on-premise Linux servers, handling system deployment, configuration, and maintenance for government infrastructure
- Collaborated with stakeholders to align system features with transport regulatory requirements and modernization initiatives

- Improved system efficiency and accessibility by digitizing manual processes and enabling streamlined franchise application workflows

Front-end Engineer (Contract)**1Bit Software Development Corporation****10/2022 – 11/2022**

- Developed responsive and user-friendly interfaces for a food delivery platform similar to Foodpanda/Grab, using React.js and SASS
- Implemented dynamic UI components and optimized frontend performance for smooth user experience across devices
- Collaborated closely with UI/UX designers to translate design mockups into functional and visually consistent web interfaces
- Integrated frontend components with backend APIs to support features such as menu browsing, ordering, and user interactions

Junior Analyst Programmer (Full-time)**Fly Asian International Corporation****03/2022 – 10/2022**

- Trained and developed backend services using Go and Gin Framework, building a strong foundation in high-performance API development
- Contributed to the development of a seamless digital wallet system, enabling efficient fund management and user transactions
- Implemented features for wallet-to-wallet transfers, supporting fast and reliable financial operations
- Assisted in designing and maintaining RESTful APIs for transaction processing and account management
- Collaborated with senior developers to ensure system stability, performance, and scalability

Educational Qualification**BS, Information Technology – Technological Institute of the Philippines**
